

Enhance the image of your existing concrete with Newlook's family of water-based Concrete Color Stains. They are non-acid, non-acrylic and contain no hazardous chemicals (VOCs), which means they are safer to use and there is no messy clean up, neutralizers, or acid-free sprayers required. You also get consistent, controllable color since they do not react with concrete.

Newlook Concrete Color Stains penetrate the surface of porous concrete without changing its texture, unlike paint or some sealers. Easily maintain both your interior and exterior concrete surfaces by restoring previously colored surfaces, changing colors, or rejuvenating old, tired-looking concrete.

Industry standard colors available, including:

- 207-Black
- 230-White
- 399-Safety Red
- 398-Safety Yellow
- 240-Safety Blue

Custom color matching and cross-reference color matching to other manufacturer's standard colors are also available.

PRODUCT COVERAGE*

Solid Color Stain (Large) covers approx. 350 sf twice**

Solid Color Stain (Small) covers approx. 45 sf twice**

Translucent Color Enhancer (Large) covers approx. 300-600 sf
