

# Chamfer Strip, Form Moldings

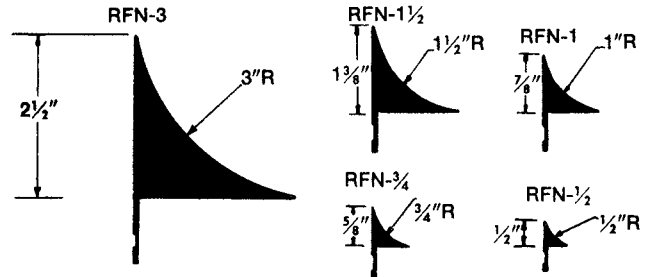

## VINYLEX CHAMFER STRIP

Vinylex chamfer strip provides an easily installed fillet to give a smooth, uninterrupted chamfer to outside edges of poured concrete. Three sizes in two styles accommodate every application. Like the radius former, the material installs easily, strips cleanly and is reusable to provide better finish with maximum economy.

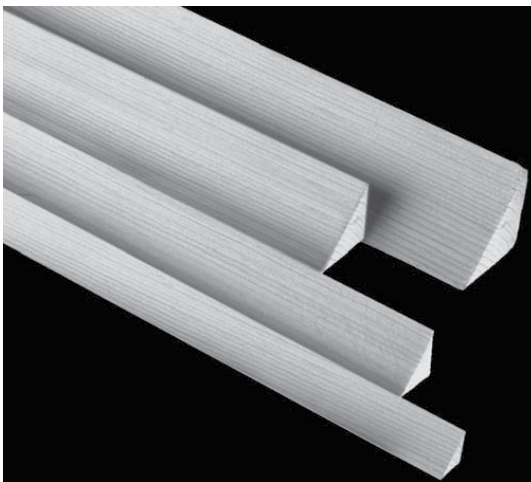

## VINYLEX RADIUS FORMER

Vinylex Radius formers are extruded from a special PVC compound to produce a smooth, uniform rounded corner to poured concrete. Four sizes allow 1/2", 3/4", 1" and 1 1/2" radius corners on columns, piers, beams, panels, and all outside corners of poured concrete. The material strips cleanly from finished concrete and is easily removed from forms for reuse.

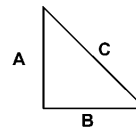

## Wood Chamfer ... for lasting impressions in architectural concrete.

Get an edge on the competition by providing lasting impressions in architectural concrete. Sylvan provides a complete line of Chamfer Strip, Keway, Rustification, and other Concrete Form Moldings which create customized appeal on every project. In an era of "value-added" merchandising, you will be able to provide your customers with unique architectural options for any concrete project.

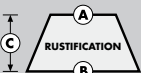

Sylvan's Chamfer is produced out of straight-grain wood which demonstrates precision machining characteristics in terms of size, shape and surface smoothness, as well as other preferred attributes such as straightness and resistance to splitting during nailing.

### Wood Chamfer Common Sizes

A	B	C
1/2"	1/2"	0.7"
3/4"	3/4"	0.9"
1"	1"	1.4"
1-1/2"	1-1/2"	2.1"
2"	2"	2.8"

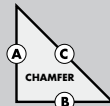

### POLY-COMP® REVEAL STRIPS (RUSTIFICATION)

Poly-Comp® Reveal Strips (Rustification) are particularly effective and economical for tilt-up projects with very low finish costs for grinding, patching and sacking. The eye catching sizes and shapes listed below are available for prompt shipment in distribution centers across North America. Consult with your Sylvan Dealer for other custom sizes made at our Poly-Comp or R-W-F custom production.\*

A	B	C	LF/ Bndl	Part No.
1/2"	1"	1/2"	400 LF	RVL-A-50-100-50
1"	2"	1/2"	400 LF	RVL-C-100-200-50
1/2	3/4"	3/4"	400 LF	RVL-E-50-75-75
3/4"	1-1/2"	3/4"	300 LF	RVL-G-75-150-75
1/2"	2"	3/4"	200 LF	RVL-H-50-200-75
3/4"	2-1/4"	3/4"	200 LF	RVL-JK-75-225-75
2"	3-1/2"	3/4"	200 LF	RVL-N-200-350-75
4"	5-1/2"	3/4"	100 LF	RVL-R-400-550-75

### POLY CHAMFER STRIP

Poly-Comp® Chamfer, in all of the below sizes, deliver smooth flawless releases for beveled corners, panel joints, or details in tilt-up, pre-cast or cast-in-place projects. Compound miter joints are easily cut with Sylvans Miter-Jaws™ Chamfer cutters to provide straight results and precision fits.

A	B	C	LF/ Bndl	Part No.
1/4"	1/4"	3/8"	1,000 LF	CHM-PC-025*
1/2"	1/2"	3/4"	1,000 LF	CHM-PC-050
3/4"	3/4"	1.06"	1,000 LF	CHM-PC-075
1.06"	1.06"	1-1/2"	500 LF	CHM-PC-106*
2"	2"	2-7/8"	200 LF	CHM-PC-200

\*Only 1/4" Poly-Comp® has been used for material radius work, while Sylvan's 3/4" Grey Plast-Flex chamfer (Part No CHM-HDFE-075) is specified for lighter radius diameters. 1.06" Double Chamfer is twice the size of full 3/4" chamfer, and is also been interchangeably used as 1" chamfer as well.

\* Custom sizes generally require 3-4 weeks for R-W-F and about 6-7 weeks for Poly-Comp; whereas the above standard sizes are generally available for prompt shipment, subject to distribution levels

## Chamfer Cutter

Sylvan is best known for its Miter Jaws™ Chamfer Cutter Hand Tool, which combines the accuracy of a miter box with the speed and convenience of a hand tool. We also provide accessory items such as cutter holders, replaceable blades and anvils. Miter Jaws™ is an industry favorite in trimming chamfer in concrete work.
