The Dust Muzzle

The Dust Muzzle uses the natural forces of the grinder to send the dust out of the exhaust port. The Dust Muzzle with a vacuum attached will remove the dust to your portable or central vacuum system.

Affordable Easy To Use Dust Collection For:
Angle Sanders Buffers & Polishers
Die Grinders Crack Chasers & Tuck Pointers
RO/DA Sanders Needle Scalers & Chipping Hammers

The Dust Muzzle is the perfect dust collection shroud for removal of paint surfaces from concrete floors. It can be used with both 4" and 7" diamond cup wheels as well as Zeck wheels. The Dust Muzzle can be used up to 1/4" from the wall and is over 98% efficient when sanding on flat surfaces.

The Dust Muzzle is an excellent tool for point of origin dust control. Installing a Dust Muzzle on your angle sanders, pneumatic random orbit and dual action sanders will virtually assure a cleaner, healthier and safer shop. The Dust Muzzle and Chip Muzzle are excellent at removing toxic paints and coatings from the job site at the point of origin.

The Dust Muzzle is available for virtually every 2" and 3" pneumatic die grinder, 4" to 8" electric or pneumatic angle sanders, and 5" and 6" electric and pneumatic random orbit and dual action sanders. In addition to the Dust Muzzle, we also offer the Chip Muzzle for all needle scalers and chipping hammers.

Originally designed for the Marine Industry, the Dust Muzzle is available for all pneumatic and electric right angle sanders from 5" through 8", all 2" and 3" pneumatic die grinders and most all electric and pneumatic Random Orbit and Dual Action sanders. The Dust Muzzle is an indispensable tool for blister repairs, anti-fouling paint removal, teak deck refinishing and general fiberglass repair.

The Dust Muzzle is available for all electric and pneumatic right angle sanders with back up pads from 4" to 8". It is also available for most all electric and pneumatic random orbit and dual action sanders with pad sizes from 5" to 6". The Dust Muzzle works excellently to pick up all random orbit sanders as well as angle grinders. The Dust Muzzle will remove explosive wood dust and create a cleaner, healthier shop. The Saw Muzzle \$59.95

Over 95% Efficient For: Concrete, Fiberglass, Wood. The Saw Muzzle uses the natural forces of the saw to send the dust out of the exhaust port.

Saw Muzzle

SAVE YOUR LUNGS AND EXTEND THE LIFE OF YOUR SAW.

OVER 95% EFFICIENT FOR:
Concrete, Fiberglass & Wood

Installs in under 3 minutes
Does not obstruct view
Extends the life of your saw

The Saw Muzzle is a set of carefully designed baffles and a specially machined bolt that allows the operator to convert any 7-1/4" Skil or Bosch worm drive saw into a dustless tool in under 3 minutes. It is made of heavy duty fiber filled ABS plastic and will last the lifetime of your saw. The Saw Muzzle uses the same 1-1/4" vacuum pickup as all our other dust collection products.
