

Hard Hats

SUPEREIGHT HEAD PROTECTION

Unique, smooth crown reduces the risk of impacting objects being trapped by ribs, ridges or slots.

Head size is selected by a convenient rear-located mechanism. The headband can be tilted to a comfortable angle while the cap remains level. It can also be raised lowered or moved front-to-rear within the shell.

Technically advanced suspension has eight load bearing points, twice as many as ordinary caps, to stabilize and balance the cap. On impact, the energy absorbing points dissipate force by reducing it into smaller increments and spreading it over a greater area.

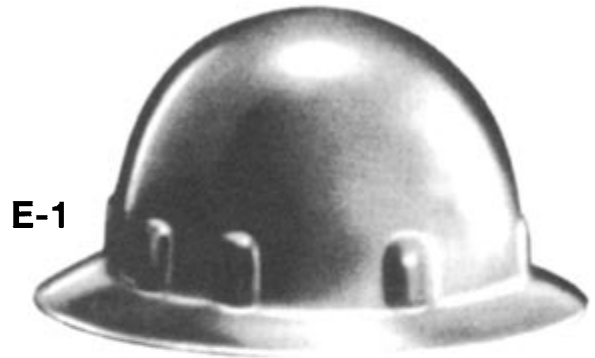

The industry's only 360° sweatband is padded for comfort and perforated to allow air to circulate for a cooling effect. Unlike partial, sewn-in sweatbands, the SUPEREIGHT's model S-2F is easily removed. The sweatband is interchangeable with model 3-R Action-Gear ratchet headband for extreme working conditions.

Our unique, smooth crown design eliminates the risk of an impacting object being trapped by ribs, ridges or slots. Model E-1 full brim hat provides protection from the sun, nontoxic splash, dust, dirt and debris. Models E-1 and E-2 are SEI certified to meet ANSIZ89.1, Type 1, Class E, G or C.

Model 3-RW2

Includes a ratchet adjustable headband (model 3-R). Wearer can adjust the fit as he works, without removing the cap. Ratchet band anchors the cap comfortably during extreme activity, high winds or when accessory products are mounted on the cap.

Protective Headwear

Skullgard® Protective Headgear

Skullgard Caps and Hats feature heavy-duty construction for use in steel mills and other heavy industries where elevated temperatures are common. Skullgard Caps and Hats meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1 1997, Class G (formerly Class A). Fiberglass Hard Hats.
