

## One-step Temporary Surface Protection

### Description

Skudo's Heavy Traffic (HT) Tack-Mat offers outstanding temporary surface protection that is easy to apply to both vertical and horizontal indoor surfaces, around corners such as stairs and door jams, on countertops, cabinets, windows and more. HT Tack-Mat features a unique self-stick surface - simply peel the backing paper and apply.

HT Tack-Mat provides long lasting surface protection for the toughest interior commercial and residential projects. The standard version of HT Tack-Mat is available in rolls measuring 40" wide by 165' long covering a total of 560 Sq. Ft.

### Benefits

- Strong bond with the surface blocks any dirt and debris from ever coming into contact with the protected substrate
- Impact protection from machinery through to foot traffic
- Stain proof protection from small spills of chemicals, solvents, paints, oils etc.
- Provides a slip resistant surface that is seamless and stationary
- Protects against color changing UV rays
- Can be used in any temperature : -40°F to +270°F
- Fire retardant in the coating
- Easy to adjust or inspect surface, simply peel up and re-position

### Uses

HT Tack-Mat is available in multiple versions\* that are specifically designed to protect a wide variety of surfaces during construction / remodeling including;

- Hard surfaces such as:
  - Marble
  - Granite
  - Terrazzo
  - Metals
  - Stone
  - Tile
  - Polished Concrete
  - Epoxies
  - Glass
- Sensitive surfaces such as hardwood, rubber or laminate flooring and carpet
- Vertical surfaces, such as walls, cabinets, doors, framing and stairs
- Small spaces such as showers, bathtubs and countertops

### Application

Skudo HT Tack-Mat is easily applied by peeling off the release paper and pressing down onto the surface.

### Removal

Simply peel up HT Tack-Mat leaving a clean, undamaged surface.

\* Please see your Skudo Representative to determine which version of Tack-Mat is best suited for your project.  
**DISCLAIMER: Skudo HT Tack-Mat is intended for interior use only and is not suited for areas that will be exposed to inclement weather and wind.**  
All adhesives have the potential to lift finished coatings or paint depending on the condition and age of the surface. Testing a small piece in a non-critical area will help you judge suitability for use.
